

HARRIS SYSTEMS

Client: Wrenbridge Land Ltd and Frogmore
Location:
Hinchingbrooke Business Park, Huntingdon
Size: 43,000 sq ft
Completion: August 2002

This new production facility was for the Broadcast Division of the Harris Corporation, a major US company specialising in radio communications. The UK company was formerly Pye of Cambridge and relocated from Coldhams Lane to the new state-of-the-art facility, where TV and radio transmitters are built. The building was also Harris's European Headquarters.

The production area is fronted by an unusual curved brick office area, with surrounding landscaping and car parking. Breathe also designed the office interior layouts for Harris.

This building is the latest of ten buildings at Hinchingbrooke to be designed by personnel who are now part of the Breathe team. The construction value, including tenant's fitout works, was over £2m.

The building is now owned by Emmanuel College, Cambridge
