

THE WORKPLACE

Client: R & J Developments, The Breathe Group
Location: Girton, Cambridge
Size: 449m² Offices, 475m² Warehouse
Completion: August 2002

A custom built office in Girton, Cambridge, The Workplace is the result of team enterprise incorporating all the skills of the Breathe Group, including architecture, interiors and air divisions. An existing "At cost" agricultural shed has been reconstructed and fitted out to provide new Offices and a Showroom, as well as storage for the Options Furniture Division.

The design incorporates a glazed frontage and cedar clad facades, a new internal mezzanine, sunken floors and meeting rooms all linked to form freely flowing open plan spaces. The mezzanine floor is linked to the ground floor by a stairwell and open balcony which act as vertical communication devices to avoid divisions within the office.

The Workplace is not only a functioning office, but also a showcase for the Group. As a result, Breathe now have state of the art AV facilities, workstations and meeting spaces, all individually designed according to job or room function.
