

an introduction

breathe | architecture

our mission

Using our in-depth knowledge of existing and future working environments, we aim to create the perfect workplace.

divisions

interiors

breathe brings together the expertise needed to help companies create an environment that supports and enhances the strategic goals of their business, whilst at the same time establishing a unique identity.

air

environmental control systems allow simultaneous heating and cooling within specific areas. Provided with complete and tailored air conditioning and refrigeration designs, installation and an annual maintenance service, companies can regulate their working environment simply, effectively and economically - with air.

options

the logistics division of breathe offers a number of services to support company developments. From furniture rental, move management and installations to secure storage facilities, options will take care of the fundamentals allowing companies to focus on what they're good at.

basics

in addition to best value for money and a quality guarantee on all furniture, we offer a complete and tailored service, from advice and design, to provision and installation, whatever your taste, requirement or budget.

architecture

service and quality are the hallmark of breathe architecture's work. From feasibility studies to final construction, the experienced team can guide a broad range of projects to successful conclusion.

Successful design is a blend of a client's aspirations and the imagination and expertise of the architect.

breath architecture is unique in both Cambridge and beyond. As you would expect from a talented, experienced team, we deliver imaginative building solutions to both the public and private sectors.

We have special and unrivalled links to the development and funding sector. This furnishes our clients with useful and often crucial introductions to sources of finance.

From initial advice and planning, through to full design and contract management, we pride ourselves on finding innovative approaches to specific requirements.

Our expertise covers specifically (but not exclusively):

- Offices and business parks
- Primary healthcare centres
- Industrial buildings
- Warehousing
- Laboratories

Listening to our clients we absorb their hopes and aspirations, and interpret these with our expertise to deliver cost effective and high quality buildings to programme.
